	<p>The Revo.Prime can also be used in confined spaces thanks to its low canopy height of only 75 mm and new ceiling design.</p>	<p>GEZE GmbH</p>
	<p>A brushless direct current motor ensures pleasant ease of access and better running behavior of the revolving door.</p>	<p>GEZE GmbH</p>
	<p>Narrow profile systems with a height of only 60 mm on the door leaf and side panels create a visually appealing impression and increase transparency.</p>	<p>GEZE GmbH</p>

IMAGE	CAPTION	SOURCE
A photograph of a modern revolving glass door at night. The door is illuminated from within, creating a warm glow. It is set against a dark background, possibly a building facade or a night sky. The door is surrounded by a dark frame and is positioned on a paved area.	<p>The new revolving door saves up to 30 per cent energy by reducing the power consumption of the drive components.</p>	<p>GEZE GmbH</p>
